NETFLIX | Global Streaming Intelligence Suite – Genre Analytics

Report prepared and analytics conducted by Soham S. Amburle | 20 March 2026

The Genre Analytics Dashboard provides a detailed and interactive analysis of content performance across different genres within a simulated global streaming platform inspired by Netflix. Built using Power BI and a synthetic dataset of approximately 2,394 records, the dashboard leverages a snowflake schema data model to replicate real-world streaming analytics.

This dashboard is designed to answer key business questions such as:

- Which genres generate the highest watch hours?
- Which genres are most frequently streamed?
- How do viewer ratings differ across genres?
- How is content consumption distributed across content types within genres?
- Which genres drive the highest engagement levels?

Through KPI indicators, charts, and interactive slicers, the dashboard enables both executives and analysts to explore genre performance efficiently.

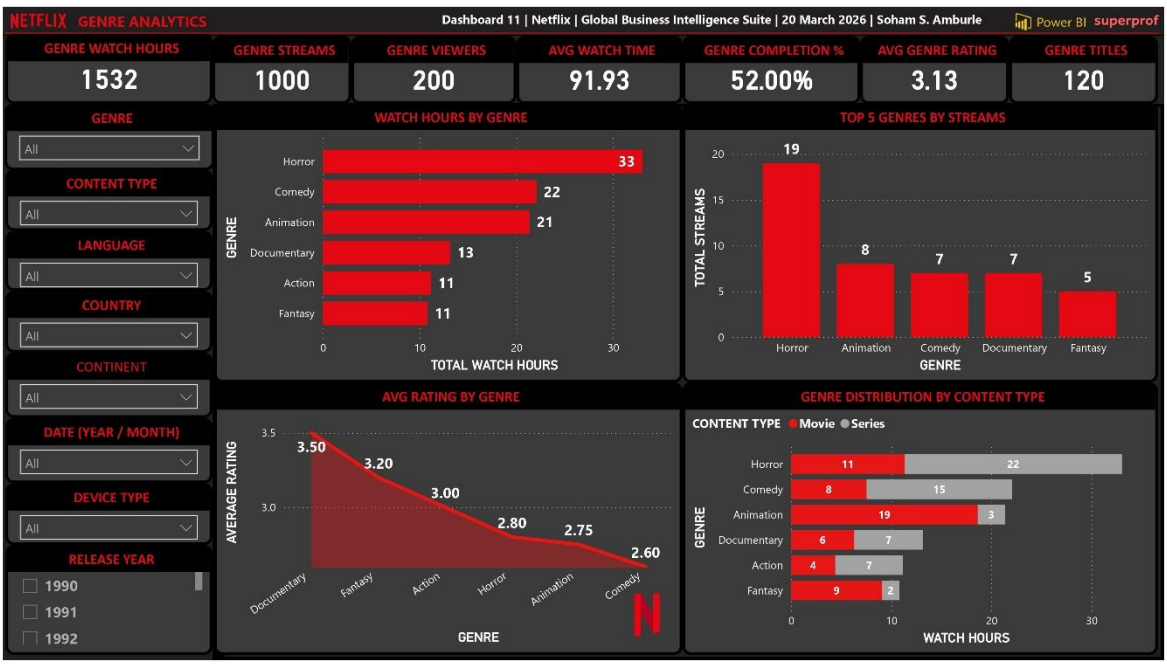

Fig 11.1 Genre Analytics

Dashboard Storyline

The dashboard follows a structured analytical flow that moves from a high-level overview toward deeper genre insights.

The first section presents KPI cards summarizing overall genre performance, including engagement, audience reach, and content availability.

The second section focuses on engagement patterns across genres, highlighting which categories generate the highest watch time and streaming activity.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

The final section provides insights into audience perception and content mix, using rating analysis and content-type distribution to evaluate genre quality and composition.

This layered approach ensures both quick insights and detailed exploration.

Dashboard Elements

The dashboard consists of three main components:

- KPI Cards for performance summary
- Interactive Slicers for filtering
- Visual Charts for genre analysis

These components create an intuitive and interactive analytical environment.

KPI Cards

Seven KPI cards provide a high-level overview of genre performance:

1. **Genre Watch Hours**: Total watch time across all genres.
2. **Genre Streams**: Total number of streams across genres.
3. **Genre Viewers**: Total unique viewers engaging with genres.
4. **Avg Watch Time**: Average watch time per session.
5. **Genre Completion %**: Percentage of completed streams.
6. **Avg Genre Rating**: Average rating across genres.
7. **Genre Titles**: Total number of content titles across genres.

These KPIs provide insight into engagement, reach, and content performance.

Slicers

Eight slicers allow dynamic filtering:

1. Genre
2. Content Type
3. Language
4. Country
5. Continent
6. Date (Year/Month)
7. Device Type
8. Release Year

These slicers enable analysis across content categories, geography, time, and platform usage.

Main Visualizations

The dashboard includes four primary visuals:

1. **Watch Hours by Genre (Clustered Bar Chart):** Highlights which genres generate the highest viewing time.
2. **Top 5 Genres by Streams (Clustered Column Chart):** Identifies the most frequently streamed genres.
3. **Average Rating by Genre (Area Chart):** Shows audience satisfaction across genres.
4. **Genre Distribution by Content Type (Stacked Bar Chart):** Displays how movies and series are distributed within each genre.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.

These visuals provide a clear understanding of genre popularity, engagement, and quality.

Business Value

This dashboard delivers several analytical benefits:

- Identifies high-performing genres driving user engagement
- Helps understand audience preferences across content categories
- Evaluates content quality using rating trends
- Supports strategic decisions for genre-based content investment
- Enables targeted recommendations and content planning

Overall, the dashboard serves as a genre intelligence tool, helping optimize content strategy and maximize engagement.

Tools and Data

- Visualization Tool: Power BI
- Dataset: Synthetic global streaming platform dataset
- Total Records: Approximately 2,394 rows across all tables
- Data Model: Snowflake schema
- Tables Used in the Dashboard:
    - Fact Tables
        - Fact_WatchHistory
        - Fact_Subscriptions
        - Fact_Ratings
    - Dimension Tables
        - Dim_Users
        - Dim_Content
        - Dim_Time
        - Dim_Geography
        - Dim_Genre
        - Dim_Language
        - Dim_Device
        - Dim_SubscriptionPlan

The dataset was generated using Mockaroo to simulate typical streaming analytics scenarios such as subscriber distribution, subscription plans, global geography, and viewing behavior.

Data Disclaimer: This dataset is synthetic and created solely for learning, analysis, and portfolio demonstration. It does not represent real user data or actual activity from Netflix or any streaming platform.
